

Statement of Purpose

Our Purpose

Clinics IV Life was created to provide critical maternal care to mothers and newborn living in disadvantaged communities across the globe. Health disparities and a lack of universal health care exist in countries that either cannot afford to provide services, or where communities suffer from high levels of poverty and are unable to afford proper healthcare.

Our charity funded sites or clinics are purpose-built facilities housing Pediatric, Obstetrics and Gynecology services. We offer these services for free to indigent members of the community. Our unique clinic model also accepts paying patients, enabling the facilities to become self-sufficient, self-sustaining centers of care for decades to come, obviating the need for supplemental donor funding.

All our endeavors are committed to providing care and improving the health outcomes of the communities we operate in. Our intent is to strengthen and support existing health infrastructure in-country to negate the existing charitable dependencies created by past historical models in developing countries. To achieve this, we undertake to;

- Act only in the best interests of the communities we serve, with the goal of improving maternal health outcomes for disadvantaged patient communities, including persons of color, women and the poor,
- Ensure that all donor funds secured are spent wisely in the interests of and for the benefit of the public and the patient communities we serve.
- To hold ourselves accountable to all our stakeholders – their community, constituents, donors, board, staff, volunteers, collaborators, and the government. We believe transparency, trustworthiness and integrity are essential components of any entity operating in the non-profit sector.
- We are committed to the careful stewardship of all human, natural, and financial resources entrusted to us.
